SELECTION GUIDE

WELCOME TO SELKIRK

Congratulations, you've come to the right place.

For over 135 years, Selkirk has created both contemporary and classic building materials. You're sure to find inspiration for your perfect home amongst our range of clay brick products. We offer colours and textures to suit any taste or architectural style. You won't find better materials to build with than those from Selkirk.

Over a century of helping Australia build better.

With our roots proudly based in regional Victoria, our progressive company has built a solid foundation on craftsmanship, service and expertise. While our focus remains on these important qualities, Selkirk is committed to innovation. Our continuous improvement and product development has made Selkirk a well respected industry leader.

More than ever, we are committed to the vision first established by our founder Robert Selkirk in 1883. His original principles of expert craftsmanship through a time-honoured technique, resulting in unique, high-quality products, still hold true today. Selkirk presents superior quality building materials for residential, landscaping and commercial projects. We invite you to take a closer look, and see what you can build with Selkirk.

WHY BUILD WITH BRICK?

Selkirk bricks have long been acknowledged as among Australia's best. Selkirk's quality procedures, ongoing investment in technology and unique clay deposits from Victoria's Goldfield region set standards for durability and strength.

SUSTAINABLE

Bricks are manufactured to last forever, making brick an inherently sustainable building material.

LOW MAINTENANCE

Bricks require minimal work to keep them looking great.

After all, your home should be a retreat, not another job!

ROBUST

Bricks are strong and will resist harsh weather conditions, termites and noise.

ENERGY EFFICIENT

Bricks have a high thermal mass producing a cooler house in summer and warmer house in winter.

This can significantly reduce your energy bills.

VERSATILE AND STYLISH

Selkirk offers a vast range of brick colours and styles to choose from.

Whether your tastes are modern, classic or anywhere in between, we have a brick to suit your project.

AFFORDABLE

You could be pleasantly surprised at just how affordable bricks are.

Furthermore, after the initial investment, ongoing costs are extremely low.

Selkirk extruded bricks and pavers are manufactured in accordance with Australian Standards.

THUNDERSTORM

the RobertSelkirk | COLLECTION

SOPHISTICATED AND CONTEMPORARY DESIGN

This range acknowledges the beauty of natural earthy origins and takes inspiration from precious stones that adds a lustrous finish to the most elegant and modern designs.

KARINYA BLEND

CLASSIC COLLECTION

TRADITION AND STYLE, PERFECTLY COMBINED

The coarse composition and hearty texture of this collection provides the opportunity to achieve a striking visual statement. Quality materials are blended with rough, natural quartz to create Goldfield Haze, Musket Haze and Rebellion Red bricks that become a fantastic feature in their own right.

MUSKET HAZE

GOLDFIELD HAZE

MUSKET HAZE

REBELLION RED

FINISHING TOUCHES

A unique brick shape or coloured mortar creates distinctive architectural features and visual interest for your project, adding a real sense of individuality.

MORTAR JOINTS AND COLOURS

Different combinations of sand and cement can have a significant impact on mortar colour, and contribute to the overall look of the final brickwork.

Changing the mortar colour from white, or natural to black can have a dramatic effect. Selkirk recommends Rolled or Flush Mortar joints when using our products.

CONCRETE MASONRY PRODUCTS

Visit our website to view our range of concrete masonry products including block, pavers and retaining walls.

NATURAL VARIATIONS IN CLAY

When considering your design please remember that clay bricks are manufactured using natural clays and minerals, and therefore colour variation between manufacturing runs is possible. Please refer to our disclaimer on the back page of this brochure.

MORTAR JOINTS

MORTAR COLOURS

Talk to your Builder or Bricklayer for more information regarding the various mortar colours available.

PREPARING FOR DELIVERY

The final step in ensuring that Selkirk provides you with an outstanding product and quality service is to ensure that your product makes it to site in a timely, safe and responsible manner. Answering these simple questions can ensure delivery is a smooth process. After all, the sooner the products arrive, the sooner your project can commence!

WHEN SHOULD I ORGANISE THE DELIVERY OF MY PRODUCT?

We recommend that you arrange your delivery to arrive at least 48 hours prior to the commencement of work. Delivering your product the same day as work starts will result in loss of time. We advise that, where possible, you take your entire order in a single delivery.

IS MY SITE ACCESSIBLE?

Delivery trucks are large – 15 metres long, 2.5 metres wide and 4 metres high – and require appropriate safe parking in close proximity to your site. All terrain forklifts, used to place building products on site, require at least 2.5 metres clear width and 3.0 metres clearance height. Therefore, our Customer Service team needs to know if there are any obstacles or restrictions that may cause difficulties in accessing your site.

If drivers are to operate equipment on busy roadways, clear ways, in close proximity to schools/crossings, double lined roadways etc, it is your responsibility to provide traffic control in order to maintain a safe working environment.

(Please note: traffic control persons must be trained and hold a current certificate of competency).

CAN MY SITE SUSTAIN THE WEIGHT OF PRODUCT AND MACHINERY DURING DELIVERY?

A forklift carrying bricks or pavers can weigh around 7 tonne. It is your responsibility to ensure that any surface the forklift traverses over is capable of sustaining this weight.

Selkirk will not be liable for any damage caused to underground services.

IS MY SITE SAFE ENOUGH?

Please ensure that children are well out of the way and pets are restrained.

Drivers are well trained and will do their best to place your product where required, but the driver has the final say when it comes to personal risk or possible site damage.

IS THERE AN EASIER WAY TO GO ABOUT THINGS?

If you are building a large house that takes up most of the block, you may consider taking delivery of the bricks for the rear of the house prior to the excavation of the site and the pouring of the slab. This will help your bricklayer avoid damage to the slab or the possibility of the driver being unable to place your product where you require it.

SMOOTH RED

A photograph of a modern, curved brick building with large glass windows and a balcony. The building is surrounded by lush greenery and trees. The Selkirk logo is visible on the brickwork.

For a list of authorised resellers, please visit our website at www.selkirk.com.au

DISCLAIMER

Selkirk clay bricks and pavers are manufactured using natural clays and minerals and are then kiln fired. This process results in natural colour variations between individual units, packs and manufacturing runs. The product colours shown in this brochure may vary to the actual product available at the time of order, subject to variations that occur during manufacture and the limitations of photography and printing.
